

CMU Registration Office

BIWEEKLY NEWSLETTER
Year 2 Vol. 15 (Jul 24 - Aug 6, 2023)

July 15, 2023

A Registration Office staff training about “Service Mind Competency,” which aims to improve staff’s knowledge and competency suitable for registration services.

Answering questions related to repeated enrollment and credit calculation toward Graduation

Repeated Enrollment

In case you received a grade of C or C+ for **major course(s)**, you may repeat enrollment for the course(s).

Credit Calculation toward Graduation

If a course is enrolled more than once, only the credit of the **most recent enrollment** is counted toward graduation, **except** when the course is allowed by the university to be enrolled more than once. The total sum of course credits is counted toward graduation.

Upcoming Events

Jul 26, 2023

- Deadline for submission of equivalent credit transfer approval for undergraduate courses to the Registration Office

Jul 28, 2023 [holiday]

- H.M. King’s birthday

Aug 1, 2023 [holiday]

- Asalha Buja day

Aug 2, 2023 [holiday]

- Start of Buddhist Lent

See example on next page

Example

Repeated enrollment in major course, e.g. the student receives a grade of C+ from the first attempt

- If the second enrollment is withdrawn (a grade of W), the previous grade (C+) and course credit will be calculated and counted toward graduation.
- If the student receives an F grade from second enrollment, they must re-enroll in the course and pass the evaluation because an F grade **cannot** be counted toward graduation. However, it will be calculated in cumulative GPA.
- Other than that, re-enrollment in courses that are allowed by the university to be enrolled more than once, e.g. Selected Topic courses, all credits from this course will be counted toward graduation.

Ratio of CMU female students

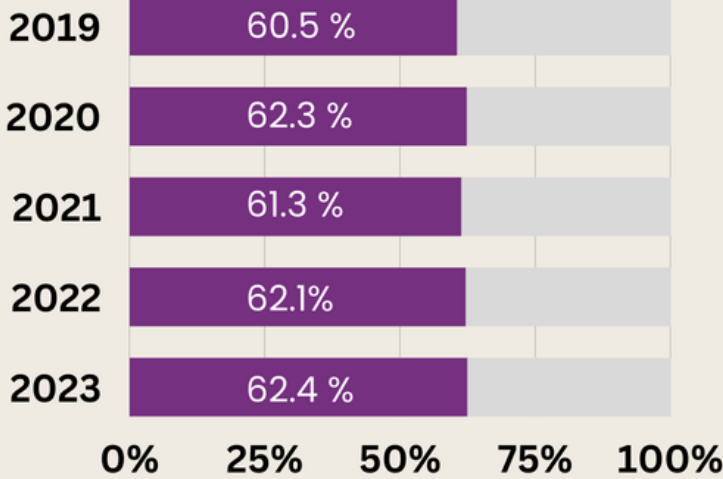

The ratio of female students admitted to CMU is averagely 60% of all student admitted. Meanwhile, in other leading institutes worldwide, the admission rate is still slightly male dominated.

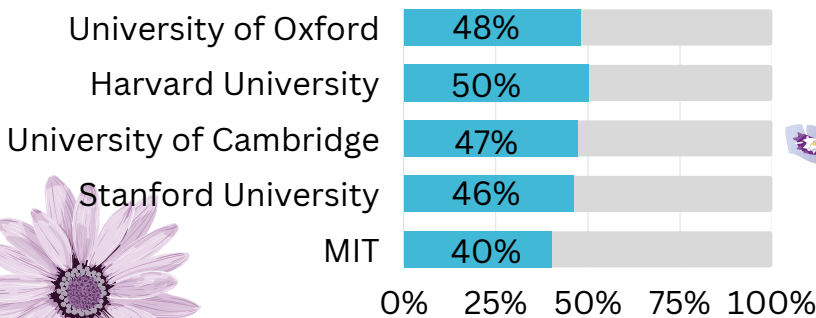

Academic Year 2023
